

NCM EBIKES

CATALOG 2022 

We believe that an ebike offers everyone the chance to travel more easily, more freely, and more sustainably. By offering a range of ebikes that prioritizes high-quality engineering, accessible design and reliably powerful performance, we strive to unlock the potential of every rider and every journey.

A photograph of two people riding ebikes on a paved path. The man in the foreground is wearing a black t-shirt, dark pants, a black helmet, and sunglasses. The woman behind him is wearing a blue button-down shirt, grey pants, a white helmet, and sunglasses. They are riding on a paved path with a glass railing on the left and a grassy embankment on the right. In the background, there is a cityscape and mountains under a clear blue sky.

JOIN

THE RIDE

WE ARE NCM

Since NCM was founded in Hanover, Germany in 2014, we've been making ebikes that empower you with the range and reliability that you need to get to wherever you need to go.

Named after nickel, cobalt and mangan, the elements that together create an ebike battery, NCM ebikes offer nothing less than a whole new way to travel, inspired by Germany's passionate cycling culture, commitment to sustainability and demand for products that are built to last.

GO FURTHER

Our ebikes are engineered from the ground up, with a focus on providing a ride that is strong, stable, and seamless. Equipped with our own Das-Kit drive and battery systems, NCM ebikes offer unparalleled distance per charge, giving you the freedom to go further.

Get ready to ride into a future of commuting, exercising, and traveling that is more convenient, more eco-friendly, and more thrilling than ever before.

Powered By **Das-Kit**

With 15 years of experience and innovation in the ebike industry, Das-Kit batteries are engineered to power ebikes of all styles and sizes.

Empowered by continuous research and development, Das-Kit drive systems patented battery structures, smart BMS, and display consoles are powerful, compact and energy efficient. Combining exceptional performance with friendly and intuitive interfaces, our integrated one-cable system controllers and quick release connectors allow for effortlessly easy maintenance.

Powered By **Das-Kit**

COMPACT BATTERIES, EPIC JOURNEYS

A unique, patented cell structure design offers batteries that pack the highest distance per charge on the market.

PEAK PERFORMANCE

Patented controller design with one-cable integration provides perfect thermal distribution, super-charging your drive systems performance and stability.

HIGH TORQUE MOTORS

A combination of rear motors and torque sensors adds up a drive system that can seamlessly adapt to any situation. On or off-road, flat or uphill, the Das-Kit torque sensor and motor provide the perfect amount of pedal assist.
